

6" Twin Cone Marine Ceiling Speaker

Description:

This compact, low-profile speaker is built with a 150mm (6") 6W driver and an edge-to-edge snap-fit grille for a clean, modern appearance. While suitable for any 100V line BGM or PA application, it is specifically designed for optimal performance on large passenger boats and commercial vessels. It includes sealed gland entries, a protective rear cover, and dual spring retention clips, along with optional screw-fixing points to ensure secure installation even in rough sea conditions.

3 Extra Fixing Screws for Secure Marine Installation

Features:

- ▶ Equipped with a 6W multi-tapped 100V transformer.
- ▶ Delivers outstanding speech clarity.
- ▶ Features a high-quality driver engineered for BGM and general paging use.
- ▶ Includes spring-loaded mounting clips with additional optional screw fixing points.
- ▶ Comes with a 4-way pluggable terminal block for loop-in and loop-out wiring.
- ▶ Integrated thermal fuse for added protection.
- ▶ Stylish aluminium mesh grille with seamless snap-fit design.

Model

CT-6YH

Power Taps	0.375/0.75/1.5/3/6W@100V
SPL (1W@1m)	92dB
